Alabama Credit Union Partners with Dynamic Cards Solutions to Offer Members Instant Issuance

Englewood, Colo.—(Feb. 13, 2006)—Dynamic Card Solutions (DCS), developer of CardWizard®, the leading instant issue and PIN selection software application for financial institutions, today announced a partnership with Alabama Credit Union that will expand DCS' instant issue technology throughout the state of Alabama.

The Alabama Credit Union selected DCS to enhance its strong debit card program by adding instant issuance to members. The credit union has been using DCS' CardWizard® software, SuperCAT® encoder for re-pinning, and DataCard's 150i embosser for instant issuance in Tuscaloosa, Huntsville, and Orange Beach.

“As we thoroughly researched different instant issuance vendors, DCS rose to the top of the list because of its excellent reputation, strong referrals from current users, and software superiority,” said Benson Bolling, Director of Business and Card Services for Alabama Credit Union. “DCS' software has delivered an extremely reliable solution with a detailed reporting system that seamlessly integrated with our existing infrastructure.”

“Offering instant issue to our members meets our primary goal to enhance member service,” said Bolling. “As our debit card program grows, we want to continue to expand the convenience of walking into our offices and having a card issued on-the-spot. In addition, we feel we can also increase activation and usage, creating a win/win for both our members and the credit union”

DCS' CardWizard instant issue software provides an easy and secure method to instantly issue and re-PIN cards, along with a user-friendly administration component that allows for full reporting, card inventory management, robust security and monitoring features required for instant issue. Additionally, DCS provides solutions for customer-selected PIN and re-PIN processes that compliment its CardWizard integrated instant issuance platform.
