Dynamic Card Solutions Awarded Patent for CardWizard's Enterprise Design

Englewood, Colo.—(April 23, 2007) — Dynamic Card Solutions (DCS), developer of CardWizard[®], the leading instant issue and PIN selection software application for financial institutions, today announced that it has been awarded patent No. 7,191,938 B2 from the U.S. Patent and Trademark Office for its flagship product, CardWizard[®] instant issue technology.

The patent, titled "Systems and Methods for Enterprise Based Issuance of Identification Cards," covers CardWizard's enterprise server component, which is the center of the CardWizard system, and the methods and associated systems used in the enterprise-wide issuance of ATM, debit and credit cards. The enterprise server component handles card production requests, logging, reporting, production queues and database storage.

CardWizard's single enterprise server and card machine controller components power all client workstations and card machines at all branch locations. The enterprise server and card machine controller components provide enhanced security and encryption of customer information, further protecting customer information from tampering. Its administrative component provides centralized management of common data used by the server, card machine controllers and client programs in the production of ATM, debit, credit and prepaid cards.

"As the leading instant issue technology on the market today, CardWizard has several unique and beneficial capabilities that stand out among competing technologies," said Ron Zanotti, VP of sales and marketing at Dynamic Card Solutions. "Having our flagship product protected by a patent issued by the U.S. Patent and Trademark Office is a testament to Dynamic Card Solutions' commitment to innovate and provide truly leading edge deliverables to our customers."

DCS' CardWizard instant-issuance software easily integrates into existing branch, host and network systems and boasts a user-friendly administration component. As an easy-to-use, component based Windows 9x/NT software application, CardWizard can be combined with a variety of card issuance machines and PIN pad devices to create flexible card issuance environments to accommodate most user requirements.

About Dynamic Card Solutions

Founded in 1996 and a wholly owned subsidiary of Dynamic Solutions International, Dynamic Card Solutions is an innovative developer of instant issuance and PIN selection solutions for banks, credit unions and retailers. Dynamic Card Solutions is the leading instant issuance provider for Visa[®] and MasterCard[®] debit cards in the United States. The company offers fully integrated solutions that allow financial institutions and retailers to quickly and securely issue ATM, debit and credit cards instantly at branch or store locations. Issuing cards instantly increases customer service, card sales and revenue, and eliminates current card issuance costs. Dynamic Card Solutions' system includes a

user-friendly administration component that provides full reporting, card inventory and more. All solutions utilize DES encryption and are compliant with recommended security procedures for instant issuance. For additional information, call 1-800-641-5215 or visit the Dynamic Card Solutions Web site at www.instantissuance.com.
